

**CAPSULE SUMMARY**  
**BA-1767**  
**O'Connor House**  
**8308 Thornton Road**  
**Baltimore, Baltimore County**  
**1930 ca.**  
**Private**

Located in the vicinity of Riderwood, the O'Connor House is a dwelling that might date to the 19th century. Prior documentation of the property states that the house is "reported to have been twice gutted and rebuilt." Whether this apparent reconstruction occurred before or after circa 1930 is presently unknown. However, exterior architectural evidence suggests that the building dates to circa 1930. It's Colonial Revival appearance might be a result of reconstruction of an earlier building, and an interior architectural survey accompanied by deed and historic research would help to determine the dwelling's construction date. The dwelling does not appear on either the 1850 or 1877 county atlases. It might be the A.E. Waters House of the 1915 atlas. If this latter possibility is the case, then the Colonial Revival appearance is the result of circa 1930 alterations to an earlier structure.

Although prior documentation on the O'Connor House suggests that it might pre-date the 20th century, there is no exterior architectural evidence to support this possibility. Alterations to the structure have resulted in the building's Colonial Revival style appearance. The side gable roof is clad in wood shingles and hangs over the south elevation as a roof for the cantilevered second-story balcony. One exterior end stone chimney of random rubble stone construction bisects the north elevation. The two-story solid random rubble stone dwelling, which fronts east and sits back from Thornton Road along a gravel driveway, features an offset entry with a sash-and-paneled single-leaf wood door with paneled soffit and recess and operable louvered wood shutters flanked by two 8/12 windows with operable paneled wood shutters. Three 8/8 windows with operable louvered wood shutters pierce the second story of the building. All façade openings have square-edged wood surrounds and sills. A one-and-a-half story ell connects the main block to the garage, which sits behind the dwelling. The circa 1930 garage is a one-and-a-half-story, two-bay-wide building with a solid random rubble stone foundation and side walls. The first story of the façade features two vehicle bays with roll-up wood doors below a gable field clad in board-and-batten siding below the wood-shingled front gable roof. One 6/6 window pierces the gable peak.

## 7. Description

Inventory No. BA-1767

### Condition

<input type="checkbox"/> excellent	<input type="checkbox"/> deteriorated
<input checked="" type="checkbox"/> good	<input type="checkbox"/> ruins
<input type="checkbox"/> fair	<input type="checkbox"/> altered

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

Although prior documentation on the O'Connor House suggests that it might pre-date the 20<sup>th</sup> century, there is no exterior architectural evidence to support this possibility. However, the structure has apparently been gutted and rebuilt to separate times. These alterations to the structure have resulted in the building's Colonial Revival style appearance. The side gable roof is clad in wood shingles and hangs over the south elevation as a roof for the cantilevered second-story balcony. One exterior end stone chimney of random rubble stone construction bisects the north elevation. The two-story solid random rubble stone dwelling, which fronts east and sits back from Thornton Road along a gravel driveway, features an offset entry with a sash-and-paneled single-leaf wood door with paneled soffit and recess and operable louvered wood shutters flanked by two 8/12 windows with operable paneled wood shutters. Three 8/8 windows with operable louvered wood shutters pierce the second story of the building. All façade openings have square-edged wood surrounds and sills. A one-and-a-half story ell connects the main block to the garage, which sits behind the dwelling.

The circa 1930 garage is a one-and-a-half-story, two-bay-wide building with a solid random rubble stone foundation and side walls. The first story of the façade features two vehicle bays with roll-up wood doors below a gable field clad in board-and-batten siding below the wood-shingled front gable roof. One 6/6 window pierces the gable peak.

**Construction dates** 1930 ca.

Evaluation for:

☐ National Register

☐ Maryland Register

☒ not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

Located in the vicinity of Riderwood, the O'Connor House is a dwelling that might date to the 19<sup>th</sup> century. Prior documentation of the property states that the house is "reported to have been twice gutted and rebuilt." Whether this apparent reconstruction occurred before or after circa 1930 is presently unknown. However, exterior architectural evidence suggests that the building dates to circa 1930. It's Colonial Revival appearance might be a result of reconstruction of an earlier building, and an interior architectural survey accompanied by deed and historic research would help to determine the dwelling's construction date. The dwelling does not appear on either the 1850 or 1877 county atlases. It might be the A.E. Waters House of the 1915 atlas. If this latter possibility is the case, then the Colonial Revival appearance is the result of circa 1930 alterations to an earlier structure.<sup>1</sup>

The land now encompassing the community formerly known as Riderwood Station and Post Office began to take shape as early as 1850, when the Northern Central Railroad extended north roughly parallel with the present Bellona Avenue and intersected with West Joppa Road. The town took its name from the Rider family, who owned significant amounts of land at this intersection. The 1850 county atlas reveals the land as improved with a cotton mill, general store, school house, and Hunt's Meetinghouse.<sup>2</sup> The farms that traversed the landscape were subdivided over the next twenty-seven years, and by 1877, many additional dwellings were constructed in the area.<sup>3</sup> Located west of Towson and south of Lutherville, Riderwood appears to have been the location of a few country houses owned by wealthy families. The Walnut Hill, Chestnut Summit, and Rider family estates were located here. The 1915 county atlas confirms that Riderwood was a suburban residential community along the railroad line.<sup>4</sup> By 1915, several large suburban estates fronted West Joppa Road and Bellona Avenue, and the area retains its turn-of-the-twentieth century character.

There is little or no physical evidence supporting a local claim that this house is a 19th century building that stood on Thornton farm. Two complete guttings and inconclusive records leave the question of its date unanswered. What should be noted, however, is that this building is a well constructed dwelling with some distinction of design. When seen in the broader context of regional building techniques its heavy stone construction separates this house from many in other areas of the state and country.

**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

Most of the original fabric of this building has been altered or replaced. However, oral history and records suggest that this building was once part of the large estate of the Rider family.

The two story stone (Gneiss) main block is three bays wide and two bays long with several additions to the South and West. A gable end roof tops the main block and is covered with wooden shingles. The exterior walls contain wide pointing (Approximately 2") between stones of random size, varying in colors ranging from light brown to charcoal.

Fenestration is somewhat irregular in placement, as the openings are off center on the main block. The east facade has the first opening in the northernmost bay measuring 4½' from the end, while the southernmost opening measures 9' 3" from that end. 8/12 sash windows on the upper level of this facade with louvered and paneled shutters are characteristically interchanged on the other facades. Each window has beaded mouldings and rounded sills.

The northern end features a massive exterior chimney measuring 22" deep and 11' 3" wide. Other dominant characteristics include the asymmetrical shoulders (one being flat on the east side and the other round) and a centrally located 6/6 sash window.

A wing extending from the main block has the appearance of a one room up/one down type house. The wall construction, fenestration, etc., is the same as the main block.

A two car garage stands 5' from this projecting wing and is also of similar construction. This building is characterized by two large wooden arched doors.

There was limited interior access. However, examination of the full basement below the main block reveals stone walls, sawn joists covered with white wash, and wire nails. Although this evidence does not support the theory of this being a 19th century building, it has been reported by the owner that the interior has been gutted twice.
